USER REPORT

Naqa (Antismoke Charitable Association Organization) has been using a Biolaz-Oberon 11 S PRO Diagnostic System with the English "Dianel-Pro" software since 01/03/2011"

Our organization is engaged in Bioresonance testing to help people quit smoking. We are a Charitable Organization, we help people quit smoking by educating them and treating them with many types of therapy such Silver Spike Point Therapy ,Nicotine Replacement Therapy and Bioresonance Therapy.

During the operation of the Biolaz-Oberon 11 S PRO system since "01/03/2011" up to "28/02/2015", about 1,000 patients were teste. We used the full "all organs" diagnostics followed by more specific Chest and Brain testes in order to determine Tobacco exposure and prepare Anti-Tobacco formula.

We find that working with Dianel the Biolaz-Oberon 11 S PRO system is very easy, it has high accuracy and does not require complicated diganostic procedures.

We also find that people treated by the method of "Biolaz-Oberon 11 S PRO" live with more comfort and relief after using device.

We didn't find any disadvantages of the Biolaz-Oberon 11 S PRO system.

We hope that the next generation of device will be able to make a specific diagnostics of the Tobacco addicion and tobacco-related disorders, the softaware will be able to make a specific tobacco diagnosis and treatment to help people to quit tobacco smoking.
